

CASE STUDY

HAREFIELD PLACE
MIDDLESEX

UNDERFLOORHEATING
DESIGN | SUPPLY | INSTALLATION

PROJECT BACKGROUND

Harefield place is an exclusive collection of 25 luxury, 2 and 3 bedroom apartments nestled in 8.5 acres of greenbelt countryside in a very desirable part of Middlesex.

What makes this development interesting is the existing building was the original Blockbuster HQ and due to its age and listed status has presented a number of challenges which have been overcome by all that have been involved.

There were a number of requirements and floor constructions used in this install with a mixture of screed and floating floors. Vaulted ceilings in the upper floors resulted in overlay systems as there was no sub-floor space. As floor height was also limited, UFHN designed a system using MERCURY minitec to provide the best output results whilst keeping the build-up to a minimum.

CLIENT

Mechanical

SIZE

2,952m² - 25 apartments

PRODUCT

**MERCURY Atlas
MERCURY Minitec**

CONTROLS

**Heatmiser Programmable
Room Thermostats**
