

CASE STUDY

CHEWTON GLEN
HAMPSHIRE

UNDERFLOORHEATING
DESIGN | SUPPLY | INSTALLATION

PROJECT BACKGROUND

The 5 Star Chewton Glen Country House hotel in Hampshire wanted to build new accommodation in its grounds, at the edge of the New Forest National Park in time for the opening of the 2012 London Olympics. This presented an interesting challenge for heating and hot water provision as the 12 luxury suites are sited in six tree houses, each with a family sized whirlpool bath, power shower and of course underfloor heating. With the deadline for the Olympics fast approaching, Chewton Glen turned to UFHN and Renewable Energy System installer PowerNaturally Ltd to jointly design and deliver a cost effective and efficient solution.

CLIENT

Chewton Glen Hotel

SIZE

800m²

PRODUCT

**Fully designed system with
20mm Mercury pipe**

CONTROLS

Programmable thermostats

“12 luxury suites sited in six stunning tree houses on the edge of the New Forest.”
