

CASE STUDY

CHAPEL RIVERSIDE
HAMPSHIRE

UNDERFLOORHEATING
DESIGN | SUPPLY | INSTALLATION

PROJECT BACKGROUND

With a prominent location on the River Itchen and with direct connections to Ocean Village and Southampton city centre, Chapel Riverside is an impressive waterside development offering high quality 1 and 2 bedroom apartments.

With a number of challenges, we worked closely with the consultant and the developer to overcome and provide solutions including developing an alternative structural deck to ensure floor levels were consistent with buildup reduced for floor coverings.

We pride ourselves on our consultative approach and technical support and were pleased to be able to provide comprehensive training to site teams to enable support to their customers.

CLIENT

Developer

SIZE

5,500m²
