

CASE STUDY

FILMWORKS
EALING, LONDON

UNDERFLOORHEATING
DESIGN | SUPPLY | INSTALLATION

PROJECT BACKGROUND

We were delighted to secure the development of the old Empire Cinema in Ealing, West London. Our in-house team designed a system that combines wet and electric underfloor heating, including wall heating in the penthouse apartments. Occupants of these particular apartments will benefit from a custom made electric ufh mat that is installed behind the bathroom mirrors to create additional heat and stop the mirrors from steaming up.

Our MERCURY heat emission plate system allows for an even heat distribution across the floor, particularly for installations on upper floors, accompanied by Heatmiser Slimline programmable thermostats, a room stat and programmer in one, providing up to 4 different temperatures at different times of day.

CLIENT

Mechanical

SIZE

9,566m² across 4 blocks

PRODUCT

MERCURY Heat emission plates

CONTROLS

**Heatmiser slimline
Programmable Room
Thermostats**
