

CASE STUDY

RSPCA THE COTSWOLDS CATS & DOGS HOME GLOUCESTER

UNDERFLOORHEATING
DESIGN | SUPPLY | INSTALLATION

PROJECT BACKGROUND

When we were approached by our mechanical client to assist with the supply and install of MERCURY electric underfloor heating into a brand new centre for vulnerable cats and dogs we jumped at the chance.

The centre which now homes more than triple the number of animals from its previous site, not only has state-of-the-art facilities for its furry occupants but also the staff can benefit from year-round comfort thanks to MERCURY electric on top of screed floor. Each area is controlled via Heatmiser thermostats, distributing heat radiantly, providing an even output in the different zones and significant energy savings.

CLIENT

Mechanical

SIZE

**472m² - 4blocks - kennels,
kitchen, offices and bathrooms**

PRODUCT

MERCURY Electric

CONTROLS

**Heatmiser Programmable
Room Thermostats**
