

CASE STUDY

STEWART FLEMMING PRIMARY SCHOOL
LONDON

UNDERFLOORHEATING
DESIGN | SUPPLY | INSTALLATION

PROJECT BACKGROUND

Due to increased demand for school places in the London borough of Bromley, the Stewart Flemming Primary School has been refurbished and extended in the construction of a single and double storey extension, providing new, modern facilities including new classrooms, offices, storage areas and toilets.

We were pleased to design, supply and install the underfloor heating over the summer break of 2020 using our popular MERCURY Atlas systems, ideal for use within screeded floors thanks to its excellent temperature outputs and quick and easy installation, typically clipped to insulation.

Finally over 20 tamperproof thermostats were installed, the ideal solution for schools or public areas where maintaining a set temperature is required.

CLIENT

Heating & Plumbing Engineer

SIZE

959m2

PRODUCT

**MERCURY Atlas using 20mm
pipe and 12 manifolds**

CONTROLS

24v Tamperproof Controls
