

CASE STUDY

LINKS ROAD
CANFORD CLIFFS, POOLE

UNDERFLOORHEATING
DESIGN | SUPPLY | INSTALLATION

PROJECT BACKGROUND

Links Road is a sought after area in Poole and this particular property arranged over two floors is designed to the highest specification, transforming the property into a stunning one off.

The refurbishment of this property meant that a low profile system was installed which reduced the impact on the existing floor height. In addition, the ground floor features a dramatic double storey atrium and therefore a separate MINITEC system was installed to take into consideration the different floor height and build up.

To keep in with the contemporary styling of the property, we advised the client to go for the Heatmiser Neo thermostats and Hub, connecting to the home broadband router and wirelessly to the neoStat's in the home.

CLIENT

Mechanical

SIZE

144m² - ground floor

PRODUCT

**Mercury M16 pipe and
Uponor Minitec**

CONTROLS

Heatmiser Neo + hub
