

CASE STUDY

OAKDALE CARE HOME
DORSET

UNDERFLOORHEATING
DESIGN | SUPPLY | INSTALLATION

PROJECT BACKGROUND

Oakdale Care Home is a brand new, purpose built facility for residential, nursing and dementia care. It has been designed to create a beautiful home environment for all its residents.

UFHN Ltd were delighted to design, supply and install a MERCURY Atlas underfloor heating system for screeded floors into all 3 floors of the 84 luxury en-suite bedrooms, communal areas, cinema, treatment rooms and nursing areas.

152 Heatmiser tamperproof thermostats were installed so the management team could easily control the ambient all-year-round temperature with no risk to the residents and 17 manifolds were positioned through the facility to deliver a faultless system.
